

Marketo and Neustar Join Forces to Deliver Precision B2C Marketing With Faster, Cleaner Data

Apr 13, 2015

The image is a screenshot of the LaunchPoint website. At the top left is the LaunchPoint logo. To its right, the text reads "What is LaunchPoint? Launchpoint Technology Partner Program". Below the logo is a search bar. A vertical navigation menu on the left lists various applications: Analytics & Big Data, Content Marketing, Customer Data, Events & Webinars, Lifecycle Marketing, Mobile Marketing, Online Ads & Campaigns, Sales Tools, Social Media, Top of the Funnel, and Video Marketing. The main content area features a large banner with the text "Your brand matters." and "Not your title. Whether you're the CMO, CTO or COO, you need trusted data and analytics to market and secure your brand." To the right of this text is a green flag with the Neustar logo. Below the banner is a section titled "Lead Intelligence: Verify & Score" with the subtext "Neustar Inc. | Applications" and a "Learn More" button. At the bottom of this section, there is a screenshot of a software interface showing a "Neustar Lead Score" and a brief description: "Neustar's Lead Intelligence enables Marketo customers to cleanse customer and prospect data prior to".

Neustar, Inc. (NYSE: NSR), a trusted, neutral provider of real-time information services and analytics and [Marketo](#), Inc. (NASDAQ: MKTO), the leading provider of engagement marketing software and solutions, today announced a partnership to give marketers the most accurate and complete data for consumer engagement. The integration further expands Neustar's already-robust partner ecosystem.

By utilizing the industry's highly regarded repository of authoritative data linked to offline, online and mobile identifiers, Neustar helps marketers create up-to-date customer databases and allows them to maximize ROI by focusing on those customers and prospects with a higher propensity to buy.

"Neustar and Marketo share a passion and dedication for transforming how marketers engage with customers," said Lisa Joy Rosner, CMO, Neustar. "Marketers will now be able to achieve even more precision in their campaigns by combining the capabilities offered by Marketo's leading Engagement Marketing Platform and Neustar's Lead Intelligence solution. This integration delivers value to more B2B and B2C marketers in a wide range of industries and builds on our joint strategy to make our leading solutions available wherever marketers need them."

B2C marketers are often overwhelmed by the scale and complexity of marketing automation because of the sheer size of their target markets. By cleansing customer and prospect data in real-time, verifying contact information and scoring prospects for quality before the data is stored, Neustar and Marketo deliver a more accurate and robust process for adding value to B2C clients with large prospect databases.

“Neustar’s Lead Intelligence Solution integration into Marketo enhances marketers’ insights into potential customers so they can better engage prospects with the right message at the right time over the right digital channel,” said [Sanjay Dholakia](#), CMO, Marketo.

Today mutual customers of Neustar and Marketo are embracing these solutions. Previously, changing customer contact information could diminish the accuracy of prospect data and result in increased costs and lost revenue. Customers are now able to create relevant conversations with their audiences, which can lead to more profitable interactions.

“Control today is shifting to the customer as marketers are increasingly faced with large volumes of ever changing data with which to evaluate, validate and synchronize. To deliver real time marketing, which is the goal, platform solutions must not only be flexible enough for adjustment in real time, but the customer and prospect data that underlies campaigns must remain constantly fresh and relevant to ensure marketers are reaching and converting the right people,” said Randy Giusto, VP and Practice Lead, at Outsell, Inc., a leading research and advisory firm focusing on information, media and technology.

With Neustar’s Lead Intelligence solution, marketers can:

- Validate and authenticate lead contact information and quality;
- Locate and append lead data;
- Qualify leads and prospects; and
- Fully automate the lead decision workflow.

Neustar’s identity solution empowers marketers with the data-driven insights needed for true one-to-one customer engagement. Neustar links verified offline data, including wireless data, to an identity foundation based

on 220 million adults and 120 million U.S. households. It further augments customer identities with more than 15,000 offline and online predictive attributes and continuously corroborates its identity data with billions of anonymized consumer transactions daily. Neustar does all of this with privacy-by-design at the core, allowing marketers to verify customer data with complete confidence.
