

Acxiom and MarketShare Announce Cross-Channel Attribution Partnership

May 14, 2015

Joining Acxiom data connectivity leadership with MarketShare attribution intelligence, marketers will connect digital touchpoints to offline results.

Los Angeles, California - MarketShare, the global leader in marketing analytics software for enterprise, announced a new strategic partnership with Acxiom, a leader in harnessing the powerful potential of data, to empower advertisers to optimize digital marketing for bricks-and-mortar sales.

The partnership begins with a specialized integration, now live, between the MarketShare DecisionCloud™ enterprise analytics platform and LiveRamp Connect, Acxiom's next generation data onboarding and connectivity service. Aligning MarketShare analytics models directly with Acxiom customer data, the integration provides the ready infrastructure to quickly onboard that data into MarketShare DecisionCloud's cross-channel attribution application.

With the integration, Acxiom will now offer MarketShare DecisionCloud to leading clients who need to pinpoint the digital media opportunities that best drive offline sales, complete with reporting and programmatic capabilities to help advertisers immediately turn insight into action.

This integration works as follows:

- LiveRamp Connect links a brand's offline purchase data to consumer-level campaign data from more than 130 digital marketing platforms in a privacy-compliant way.
- MarketShare DecisionCloud analyzes this data to calculate how each engagement along the path to purchase contributes to offline and online business results.
- MarketShare DecisionCloud translates these calculations into advertiser-specific, consumer-segment focused digital marketing plans—encompassing marketing outlets including digital display, search, social media, and addressable TV—for optimal bricks-and-mortar and online revenue.
- Customers receive these insights through highly intuitive and actionable MarketShare DecisionCloud reporting and dashboards.
- MarketShare DecisionCloud also passes these plans to LiveRamp Connect for automated advertising opportunities, including targeting that amplifies efforts dramatically by engaging audiences with similar profiles to the ones already analyzed.

"Our goal is to help our clients manage seamlessly integrated, best-of-breed marketing stacks," said Venky Natrajan, Sr. Vice President, Marketing Services Products and Engineering, Acxiom. "Helping advertisers tap the full potential of digital marketing to drive online and offline revenue is one of the most critical use cases for Acxiom's clients. We are excited to partner with MarketShare to address this need for marketers."

“For any business with offline sales channels, identifying which online levers will drive optimal bricks-and-mortar results is absolutely critical,” said William Merchan, SVP Strategic Alliances & GM Dynamic Pricing, MarketShare. “By joining Acxiom’s highly sophisticated view of the customer journey with MarketShare’s cross-channel attribution capabilities, we’re empowering marketing that drives sales across all channels more effectively than ever before.”
