

NeuStar and Communology to Provide End-to-End Client/Server Solution for Mobile Instant Messaging

Apr 2, 2009

NeuStar announces that it has entered into a frame agreement with Communology, a leading

solution provider of carrier-grade client applications and device testing, to develop a

comprehensive client/server solution for mobile instant messaging (IM) on behalf of one of

NeuStar's leading mobile network operator customers that operates in multiple countries across

Europe.
