
Neustar Launches Enterprise Professional Services Offerings

Jan 3, 2013

STERLING, VA - [Neustar](#), a trusted, neutral provider of real-time information and analysis to the Internet, telecommunications, information services, financial services, retail, media and advertising sectors, today announced the launch of [Neustar Professional Services](#) with a comprehensive suite of IT service offerings for enterprise organizations of all sizes. Neustar's seasoned team of professionals provides the expertise and resources organizations need to ensure the performance, security and reliability of their IT infrastructure.

Organizations today face complex IT challenges, including reduced budgets and insufficient IT staff to meet critical deadlines. Using its proven three-dimensional methodology – discover, design, deploy – Neustar's team of experts helps customers identify the root of their IT problems and creates a comprehensive and technologically neutral solution to meet the customers' objectives. Once the solution is implemented, the team is available around the clock to help sustain critical systems and adjust to meet the organization's evolving needs.

"Our team has vast expertise in critical IT disciplines, from web performance to security," said Alex Berry, senior vice president of Enterprise Services at Neustar. "Each engineer has senior-level technical experience and brings a neutral, independent perspective to the job. With Neustar Professional Services, IT departments can extend themselves with confidence and get the results they need."

Neustar Professional Services offerings include:

- **Security and Reliability:** Comprehensive assessments that include network vulnerability and penetration testing to deliver holistic and actionable insights to prioritize resources for maximum security—all while meeting best practices.
- **Web Performance Analysis and Testing:** Full-service website load testing that helps organizations protect their customers' experience by identifying traffic bottlenecks, ensuring sites can handle traffic and providing custom recommendations for improving performance.
- **Integration, Migration and Training:** Services that help customer IT departments integrate or migrate systems and policies effectively on any platform, while also providing in-depth training to enable customers to use the capabilities available through their solutions.
- **Consulting Services:** Services that help organizations accelerate projects, fill critical staffing gaps and access expertise in technical account management.
