

NeuStar Expands UltraDNS Network Infrastructure in Europe

Jul 7, 2009

NeuStar announces the deployment of a new UltraDNS network node in Amsterdam, Holland,

further expanding NeuStar's global managed DNS infrastructure. The new node, the third in

Europe along with London and Luxembourg, further increases the reliability and performance of

the UltraDNS Managed DNS Service, especially for end users in Europe who will experience

even faster resolution times for domains hosted on UltraDNS infrastructure.
